

TIME to  
STUDY

# CTE AND JUNIOR HIGH

Leaman Counseling Team

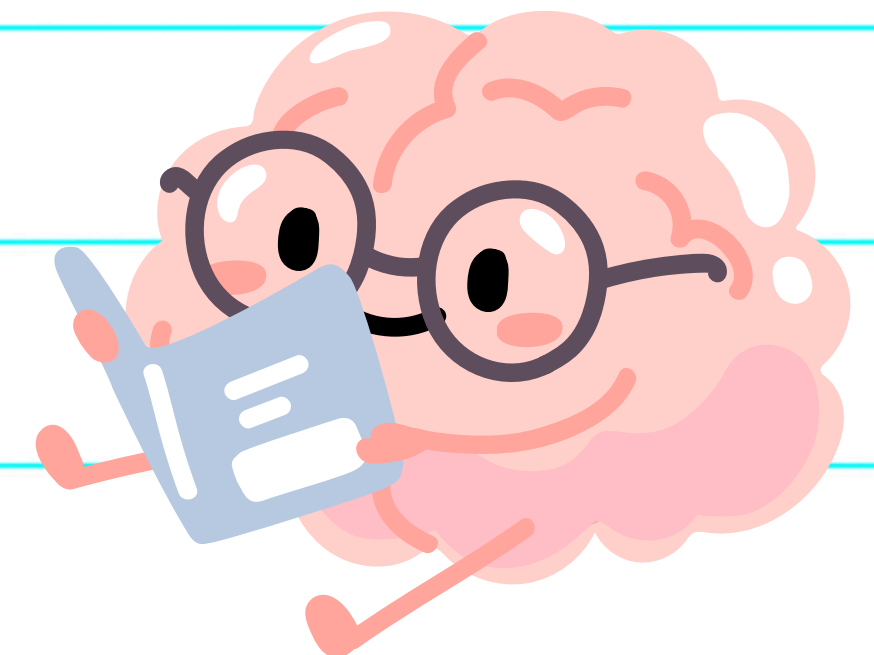

Leaman Junior High School

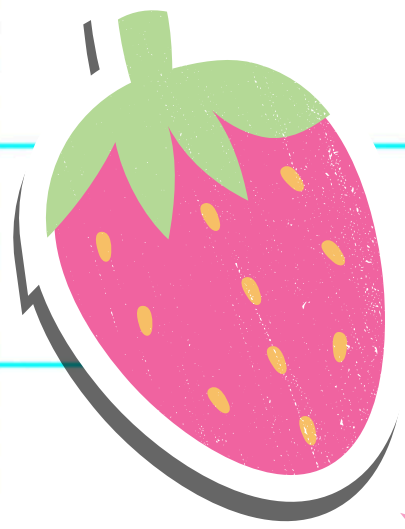

**Earning a high school credit in junior high allows your student to complete graduation requirements early, take more electives, and provide challenging course work.**

**It is helpful to begin taking prerequisites for future endorsement electives.**

The following classes are offered at Leaman in the 8th grade for high school credit. This allows students to take the introductory class toward that program of study. Taking the introductory class at DLJH allows for students to get a jump start on completing their endorsement credits. If none of these intro classes are toward your program of study, DLJH also offers foreign language and fine arts credit classes as well.
