DYSLEXIA SERVICES

What is Required

The District's Board of Trustees is responsible for ensuring that campuses are implementing procedures for identifying and providing appropriate, evidence-based instructional services to all students with dyslexia or related disorders. The District's procedures must be implemented according to the approved strategies for screening, individualized evaluation, and techniques for treating dyslexia and related services as described in *The Dyslexia Handbook: Procedures Concerning Dyslexia and Related Services* ("The Dyslexia Handbook"). The District must report through PEIMS the number of students enrolled in the District who are identified as having dyslexia.

Parent Notification

Parents or guardians of a student with dyslexia or a related disorder must be informed of services available through Special Education as the option for an evaluation and services under the IDEA.

The District must provide written notification to the student's parent or guardian at least five days before any evaluation or identification procedure is used with a specific student suspected of having dyslexia or a related disorder. This notice must be in English or in the parent or guardian's native language and include the following:

- A reasonable description of the evaluation procedure to be used with the student;
- Information regarding instructional interventions or strategies provided to the student prior to the evaluation;
- An estimated time frame for completion of the evaluation; and
- Contact information for the Campus Dyslexia Personnel that the parent can contact regarding dyslexia services, relevant parent training and information projects, and any other appropriate parent resources.

Before an initial FIE is conducted to determine whether a student, who is suspected to have dyslexia or a related disorder, has a disability under the IDEA, the Campus Special Education Personnel must comply with the special education procedures related to Prior Written Notice and Referral for Possible Special Education Services as well as provide the parent with all information indicated above. See [PRIOR WRITTEN NOTICE] and [REFERRAL FOR POSSIBLE SPECIAL EDUCATION SERVICES]. Campus Special Education Personnel shall also provide the parent a copy of the Notice of Procedural Safeguards and give the parent an opportunity to give written consent for an initial FIE.

See [CONSENT FOR INITIAL EVALUATION] and [CHILD FIND DUTY].

Universal Dyslexia Screening & Identification

To comply with child find requirements, the District must screen or test all students for dyslexia and related disorders at appropriate times in accordance with The Dyslexia Handbook and state law. Specifically, the law requires that all kindergarten and first grade students be screened for dyslexia and related services. In addition, the law requires the District to administer to students in kindergarten, first grade, and second grade a reading instrument to assess student reading development and comprehension. This law also requires the District to administer a reading instrument at the beginning of seventh grade to students who did not demonstrate reading proficiency on the sixth-grade state reading STAAR.

Only District or Campus Personnel who are trained in valid, evidence-based assessments and can appropriately evaluate students for dyslexia and related disorders should conduct the screenings. This includes an individual who is certified/licensed in dyslexia or a classroom teacher who holds a valid certification and who is trained in instructional strategies that use individualized, intensive, multisensory, phonetic methods, as well as a variety of writing and spelling components.

The District is required to consider prior screenings and testing before rescreening or retesting a student determined to have dyslexia during a prior screening or testing.

The District may not use early intervention strategies, such as Response to Intervention systems or other multi-tiered systems of support, to delay or deny the special education evaluation of a student suspected to have a specific learning disability, including dyslexia or a related disorder.

Dyslexia Services

The District must provide a reading program for any student with dyslexia or a related disorder that is in accordance with the descriptors and implementation requirements found in The Dyslexia Handbook. All Dyslexia Providers must be trained in the instructional strategies that use individualized, multisensory, phonetic methods and a variety of writing and spelling components as described in The Dyslexia Handbook.

The District must provide each student identified as having dyslexia access to the District's dyslexia services with a provider trained in dyslexia and related disorders at the student's campus. Additional services can be offered at a centralized location if the parent or guardian agrees to the services, but centralized services must not prevent the student from receiving services at the student's campus.

Parent Education Program

Campus Personnel must provide parents or guardians of students suspected of having dyslexia or a related disorder a copy or a link to the electronic version of The Dyslexia Handbook as soon as the suspicion arises.

The District and/or Campus Personnel must also offer a parent education program for parents or guardians of students with dyslexia and related disorders. This program must include:

- Awareness and characteristics of dyslexia and related disorders;
- Information on testing and diagnosis of dyslexia and related disorders;
- Information on effective strategies for teaching students with dyslexia and related disorders;
- Information on qualifications of those delivering services to students with dyslexia and related disorders;
- Awareness of information on accommodations and modifications, including those for statewide assessments;
- Information on eligibility, evaluation requests, and services available to the student under IDEA, and information regarding intervention processes, such as Response to Intervention; and
- Contact information for the relevant regional and/or District specialists for dyslexia and related disorders.

Definitions

“Dyslexia” is a disorder of constitutional origin manifested by a difficulty in learning to read, write, or spell, despite conventional instruction, adequate intelligence, and sociocultural opportunity.

“Related disorders” include disorders similar to or related to dyslexia, such as developmental auditory imperception, dysphasia, specific developmental dyslexia, developmental dysgraphia, and developmental spelling disability.

“Universal screening” is defined as a universal measure administered to all students by qualified personnel to determine which students are at risk for dyslexia or reading difficulties and/or a related disorder. Screening is not a formal evaluation.

Additional Procedures

Dyslexia Screening & Identification

Campus Personnel are responsible for ensuring that all students in kindergarten and first grade are screened for dyslexia in an appropriate and timely manner. Before screening may take place, District or Campus Administration will select a screening instrument from the Commissioner's List of Reading Instruments list for Campus Personnel to use that addresses the following skills:

- Kindergarten – Letter Sound Knowledge or Letter Naming Fluency; Phonological Awareness
- First Grade – Word Reading Accuracy or Fluency; Phonological Awareness,

Screenings for all kindergarten students should take place in the later part of the spring semester. Considerations for scheduling the kindergarten screener may include the following factors: (1) has adequate time for instruction been provided during the school year; (2) has adequate time been provided to compile data prior to the end of the school year; (3) how will the timing of the screener fit in with the timing of other required assessments; (4) has sufficient time been provided to inform parents in writing of the results of the reading instrument and whether the student is at risk for dyslexia or other reading difficulties; (5) has adequate time been provided for educators to offer appropriate interventions to the student and (6) has sufficient time been provided for decision making regarding next steps in the screening process.

Screenings for all first grade students should take place no later than the middle of the school year and must conclude by January 31 of each year. Results of the dyslexia and related disorder screenings for students in Kindergarten and Grade 1 shall be reported through the Texas Student Data System Public Education Information Management System (TSDS PEIMS).

All Campus Personnel conducting screenings must understand and be able to identify primary characteristics of dyslexia, including challenges with reading words in isolation, decoding, reading orally, and spelling. In addition, the individuals who administer the screening instrument must also document student behaviors observed during the administration of the instrument, including lack of automaticity, difficulty sounding out words left to right, guessing, self-correcting, inability to focus on reading, and avoidance behavior.

Campus Administration will verify that all Campus Personnel conducting screenings have undergone the required trainings and are properly certified to fill this role. Specifically, an individual who administers and interprets the screening instrument must, at a minimum, be an individual who is certified/licensed in dyslexia or a classroom teacher who holds a

valid certification for kindergarten and Grade 1. Where possible, the student's current classroom teacher will administer the screening instrument for dyslexia and reading difficulties. Then, the teacher (or other Campus Personnel) conducting screenings will report the results of dyslexia and related disorder screenings required for each student in kindergarten and first grade through PEIMS. The results must also be provided to the parent of the student with an explanation of the scores.

Campus Personnel will continue to monitor students for common risk factors for dyslexia in second grade and beyond.

Based on the universal screener for reading and dyslexia, if a student is at low risk for reading difficulties, the campus will continue evidence-based core reading instruction and continue to monitor the student for reading difficulties in the future.

If the student is at risk for reading difficulties, Campus Personnel will gather both quantitative and qualitative information about the student. Quantitative information may include current dyslexia screening instruments, previous dyslexia screening instruments, formal and informal classroom reading assessments and/or other skill assessments, vision and hearing screening, state assessment reports, curriculum-based assessments, and attendance records. Qualitative information may include observations of student during screening, other observations of student progress, teacher observations and reports, parent/guardian input (e.g., family history, early language skills), current student work samples, academic progress reports, work samples from earlier grades, and/or accommodations and intervention history and data.

Both quantitative and qualitative information will be reviewed by a Student Support Team which should include individuals who have knowledge of the student, are appropriately trained in the administration of the screening tool, are trained to interpret the results, and recognize characteristics of dyslexia. The Student Support Team may consist of the student's classroom teacher, the counselor, the campus or district dyslexia specialist, the individual who administered the screener, a representative of LPAC, assessment personnel, the parent, and/or an administrator. The Student Support Team is not the ARD Committee or a Section 504 Committee, although many of these individuals may be on a future committee if the student is referred for an evaluation and qualifies for services and/or accommodations. The Student Support Team shall analyze the data and make a decision as to whether the student's reading difficulties are or are not consistent with characteristics of dyslexia and related disorders.

If the Student Support Team determines that the data does not give the members reason to suspect that a student has dyslexia, a related disorder or other disability, the Student Support Team may decide to provide the student with additional supports in the classroom or through the Response to Intervention process or other Campus-based intervention system. However, the student is not referred for an evaluation at this time.

If the Student Support Team suspects that the student has dyslexia or a related disorder,

the Student Support Team should refer the student for an initial FIE under the IDEA, as there is a reason to suspect that special education services are necessary for the student. See [REFERRAL FOR POSSIBLE SPECIAL EDUCATION SERVICES].

It is important to remember that at any point in the process, a referral for a dyslexia evaluation may be made under IDEA if a disability and a corresponding need for special education services are suspected. Progression through the intervention process is not required in order to begin the identification of dyslexia. For example, Campus Personnel should refer a student for a dyslexia evaluation if regular progress monitoring reflects a difficulty with reading, decoding, and/or reading comprehension or when a student is not reaching grade-level benchmarks due to reading difficulty. In addition, parents or guardians have a right to request a referral for a dyslexia evaluation under the IDEA at any time. While the use of tiered intervention may be part of the identification and data collection process for dyslexia, Campus Personnel must ensure that evaluations of students suspected of having a disability are not delayed or denied because of the implementation of tiered interventions, especially when parent or teacher observations reveal the common characteristics of dyslexia.

Referral for IDEA Evaluation

If the Student Support Team determines that dyslexia or a similar disability is suspected and there is a suspected corresponding need for special education services, the Student Support Team must refer a student for an initial evaluation under the IDEA. The Student Support Team will make decisions regarding referrals on a case-by-case basis, carefully considering all data obtained from screenings and other sources. In addition, parents or guardians may also request a referral for an initial evaluation under the IDEA. District Assessment Personnel must seek parental consent for an FIE and follow all procedural safeguards required under the IDEA, including the provision of proper Prior Written Notice and a copy of the Notice of Procedural Safeguards to the parent. See [CHILD FIND DUTY] and [REFERRAL FOR POSSIBLE SPECIAL EDUCATION SERVICES] and [CONSENT FOR INITIAL EVALUATION]

Provision of Dyslexia Services

If a student is evaluated under IDEA and the results of the evaluation show that the student has dyslexia or a related disorder, the student may be eligible for dyslexia services. If the student is determined to be eligible under the IDEA, and the ARD Committee determines the student requires specially designed instruction, the student will receive related services, supplementary aids and services, accommodations, or program modifications, as determined by his/her ARD Committee.

Dyslexia services provided must address the following critical, evidence-based components:

- Phonological awareness

- Sound-symbol association
- Syllabication
- Orthography
- Morphology
- Syntax
- Reading comprehension
- Reading fluency

In addition to the above content, it is also critical that the way the content is delivered is consistent with research-based principles. Campus Administration and the Dyslexia Service Provider will ensure that all of the following principles of effective intervention for students with dyslexia are utilized:

- Simultaneous, multisensory
- Systematic and cumulative
- Explicit instruction
- Diagnostic teaching to automaticity
- Synthetic instruction
- Analytic instruction

The District Administration will ensure that dyslexia instruction is provided by individuals trained to deliver such instruction. Teachers, such as reading specialists, master reading teachers, general education classroom teachers, or special education teachers, who provide dyslexia intervention for students are not required to hold a specific license or certification. However, every provider of dyslexia instruction must be fully trained in the LEA's adopted instructional materials for students with dyslexia. A PDI does not have to be a certified special education A PDI does not have to be a certified special education teacher unless the individual is employed in a special education position that requires that certification. LEAs will determine whether the position requires the certification. The most highly trained and qualified individuals need to be the ones providing dyslexia instruction, including in an evidence-based dyslexia program. Because paraprofessionals must work under the supervision of teachers, a paraprofessional cannot be the person providing instruction to students in the evidence-based dyslexia program. While literacy achievement academies are valuable resources for any teacher involved in the science of teaching reading, completion of this academy does not meet the requirements for a PDI to be considered fully trained.

District Administration will decide whether to purchase a reading program or develop its own evidence-based reading program for students with dyslexia and related disorders. If the District decides to develop its own reading program, District Administration must ensure that the program is aligned with the procedures in The Dyslexia Handbook, including the required components and principles above.

The District will maintain documentation requirements of compliance associated with

Texas Student Data System (TSDS), Public Education Information Management System (PEIMS), and State Performance Plan (SPP). District staff will provide training, with follow up, to ensure the documentation required is in place and compliant.

In Lamar CISD for the 2023-24 school year, the following interventions are used for students with dyslexia:

Grades	Intervention Program
K-2	Phonics Blast or Reading by Design
3-5	HD Word or Reading by Design
6-12	HD Word or Reading by Design
Bilingual	Esperanza

Blast Foundations is a phonics and phonemic awareness program with hands-on multisensory and manipulative-based instruction.

HD Word is a set of lessons that efficiently teaches the foundational skills that lead to strong decoding and fluent reading. The lessons systematically teach the essential phonics structures that unlock the English code in both simple and complex words. While the focus of HD Word is word study (phonics and phonemic awareness), there is a high rate of transfer to students' skills in other areas of reading, such as fluency and comprehension. The net effect is faster, more accurate, and more confident readers.

Reading by Design is a set of lessons that align with the components of dyslexia instruction. Volume 1 covers the alphabetic principle. Volumes 2-4 cover the six syllable types, digraphs, diphthongs, vowel pairs, consonant clusters and special situations. Volume 5 covers morphology, including Greek and Latin roots.

The Esperanza program is a Spanish multisensory structured language approach for reading, writing, and spelling. The goal of the Esperanza program is to provide a multisensory, sequential, systematic approach to achieve Spanish literacy.

The Esperanza program is designed for emergent readers in first and second grade. The goal of this level is to systematically and cumulatively develop a strong knowledge

of the structure of the Spanish language so that the student can read, write, and spell in their primary language.

In Lamar CISD for the 2023-24 school year, Handwriting and/or Keyboarding Without Tear or Reading by Design is the intervention used for students with dysgraphia.

Evidence of Implementation

- Cumulative Student Data
- Instructional Strategies Provided and Student Response
- FIE
- Evidence of Trainings for Campus Personnel Administering Screenings
- Certifications of Campus Personnel Administering Screenings
- Evidence of Training for Dyslexia Service Providers
- Certifications of Dyslexia Service Providers
- ARD/IEP
- Section 504 Plan
- Right to Information Provided to Parent
- Receipt From Parent of The Dyslexia Handbook
- Receipt From Parent of Procedural Safeguards Under IDEA and/or Section 504
- Approved Dyslexia Program
- Documentation of Dyslexia Services Provided to Student
- Documentation of Student Support Team Meetings
- Documentation for the state in TSDS, PEIMS, and SPP
