

**ACADEMIC ACHIEVEMENT**

**EI (LOCAL)  
ADMINISTRATIVE REGULATION**

**YEARLY AVERAGING**

All successful completion of a two-semester course is based on a minimum of 70 percent mastery. This is represented by the yearly average of the two semester grades regardless of whether the passing grade is obtained in either the first or second semester. This policy starts with grades earned in the 2012-2013 school year and is subject to other provisions as defined in the student handbook or other district guidelines.

If a student is denied credit for either semester due to a lack of attendance FEC (LOCAL), the student must remediate that semester. Once the semester is remediated the grade earned will be eligible for averaging.

**PARTIAL AWARD  
GUIDELINES**

Per EI (Legal) a student may satisfy graduation requirements by successfully combining two half-credits of two different courses from the lists provided in the Texas Administrative Code to satisfy a fourth math or science credit. The combination of two half-credits from two different courses is not eligible for grade averaging.
